

YOUNG RESEARCHERS IN PROGRESS

In order to promote career development among the future experts of tomorrow, I am pleased to announce that the next EMCA workshop will host a session exclusively for young researchers. This exciting addition aims to provide a platform for those who are at an early stage of their scientific careers. The purpose of this session is to stimulate young researchers, reward excellence and facilitate the formation of networks between peers and top experts from different disciplines, research institutions and countries.

Please note that to be eligible to contribute to this session, applicants must either be working towards or have recently completed a BSc or MSc in Vector Biology or a related discipline. PhD students are not eligible to apply. A letter from each applicants supervisor confirming student status must be submitted with each abstract on university headed paper.

CALL FOR ABSTRACTS

We invite abstracts for the following topics areas within medical entomology:

- Vector Control
- Vector Biology
- Vector Ecology
- Vector-borne disease modelling
- Systematic entomology

DEADLINE FOR ABSTRACT SUBMISSION

The deadline for abstract submission is December 20th, 2008. Papers will be accepted for both oral and poster presentations.

Awards will be given for best oral and poster presentations.
